

PROTECTING OUR FORESTS FOR THE FUTURE

Logging in state forests has cost NSW taxpayers more than \$43 million over the past three years.

Logging not only destroys beautiful forests containing essential habitat for native plants and animals but also costs NSW \$495 for everyhectare that is logged.

Our forests are priceless and need to be managed for everyone, so that our environment is protected, taxpayers benefit and more people can have more access to these beautiful places.

Our forests are priceless and need to be managed for everyone, so that our environment is protected, taxpayers benefit and more people can have more access to these beautiful places.

State Forests are some of our most important, beautiful and bio-diverse places. Forests like the Gardens of Stone State Forest in the Blue Mountains, Wedding Bells State Forest in the mid-North Coast and Tanja State Forest on the far South Coast must be protected.

With the end of logging we can save tax payers millions, greatly improve environmental protection and provide far more access for recreational users and sensitive eco-tourism to some of the State's most beautiful natural places.
