We need an inquiry into the roadside drug testing scheme

To the Honourable the President and Members of the NSW Legislative Council, this petition of certain citizens of NSW notes that:

- The Roadside Drug Testing scheme tests for the mere presence of just four drugs rather than testing for levels that reflect impairment
- The scheme also fails to test for all drugs known to have an impact on road safety
- Users of cannabis have tested positive under the scheme days or weeks after their last consumption despite posing no identified risk to other road users
- The suspension of a drivers license can result in a person losing their job, being unable to see family and friends and losing healthcare access

Your petitioners request the House to

- ☑ Call for the suspension of the mobile drug testing scheme while these concerns are addressed
- ☑ Undertake a comprehensive inquiry into the scheme including the effectiveness of the current testing on road safety, the impact on communities around NSW and global best practice
