

# PETITION: A GREEN NEW DEAL

To the Honourable the President and Members of the NSW Legislative Council, this petition of certain citizens of NSW notes that:

- Climate change is already destroying lives and livelihoods and ecosystems are collapsing
- Endless extraction of fossil fuels for private corporate profit is unsustainable for life on this planet
- Your petitioners demand a fully-funded transition to a carbon free economy that leaves no worker and no community behind

Your petitioners therefore request that this parliament ensures:

- No new coal, oil and gas projects
- 100% publicly-owned renewable energy generation by 2030, and
- A fully-fund just transition for all fossil-fuel workers & communities
